

Senthil Nagappan — AI Governance Engagement Brief

AI Experience Design & Human Systems Integration · AIGP (IAPP) · CPACC+WAS · CUA · CSM

arnsk3@gmail.com · 571-403-0835 · Frisco, TX (DFW) — remote / open to relocation · www.senthilnagappan.com

POSITIONING

18+ years delivering safe, compliant, human-centered AI across healthcare, federal, financial-services, and enterprise environments — including financial-services delivery at JPMorgan Chase and Morgan Stanley. I run AI governance as an engagement: assess, gap analysis, control design, roadmap, operate — with deliverables risk and audit teams sign off on.

ENGAGEMENT ARC

01 Assess — model inventory, regulatory mapping, maturity baseline
02 Gap analysis — controls scored against NIST AI RMF, EU AI Act, ISO/IEC 42001, SR 11-7
03 Control design — oversight tiers, genAI prompt/data controls, evaluation & monitoring, evidence capture
04 Roadmap — sequenced 90-day + 12-month remediation and operating plan
05 Operate — monitoring cadence, audit-ready reporting, evidence as a byproduct of use

REPRESENTATIVE ENGAGEMENTS

Federal Compliance Governance — Social Security Administration (shipped). Accessibility governance as a standing compliance program across 15+ modules serving 50M+ citizens: control taxonomy traced to WCAG 2.2 / Section 508, CI/CD quality gates at commit, quarterly auditor readouts. 40+ monthly releases gated; \$1.5M+ annual savings.

TrustLens — AI Governance Program Build (in-house concept). Maturity scorecard, control matrix mapped to NIST AI RMF / EU AI Act / ISO 42001, 90-day roadmap, one-click audit-ready evidence packages. 6-week assessment-to-roadmap cycle; 92% of controls with live evidence coverage; ~70% reduction in audit-prep effort (est.).

Model-Risk Modernization — Financial Services (concept). SR 11-7-aligned inventory & tiering across ML and genAI, validation cadence with effective-challenge workflow, genAI risk controls, board-ready reporting. Targets: 100% inventory coverage; -35% validation cycle time; +40% findings-remediation rate.

CROSS-FUNCTIONAL COORDINATION

Weekly governance cadence and a single decision log across privacy, security, risk & compliance, legal, engineering, and product — so controls specified by risk ship in engineering sprints and stand up to legal's read of the regulation.

FRAMEWORKS & TOOLING

NIST AI RMF · EU AI Act · ISO/IEC 42001 & 23894 · SR 11-7 · U.S. policy landscape (EO 14179 & 2025-26 federal framework, OMB M-25-21/22, state AI laws CO/TX/CA) · WCAG 2.2 / Section 508 · FDA HFE / IEC 62366
GRC, data & model tooling: ServiceNow GRC / Archer · Collibra / Alation · model registries & ML platforms
GenAI risk controls: prompt & data controls · evaluation harnesses · monitoring · model documentation & testing
